Section A-A Scale: 1/200

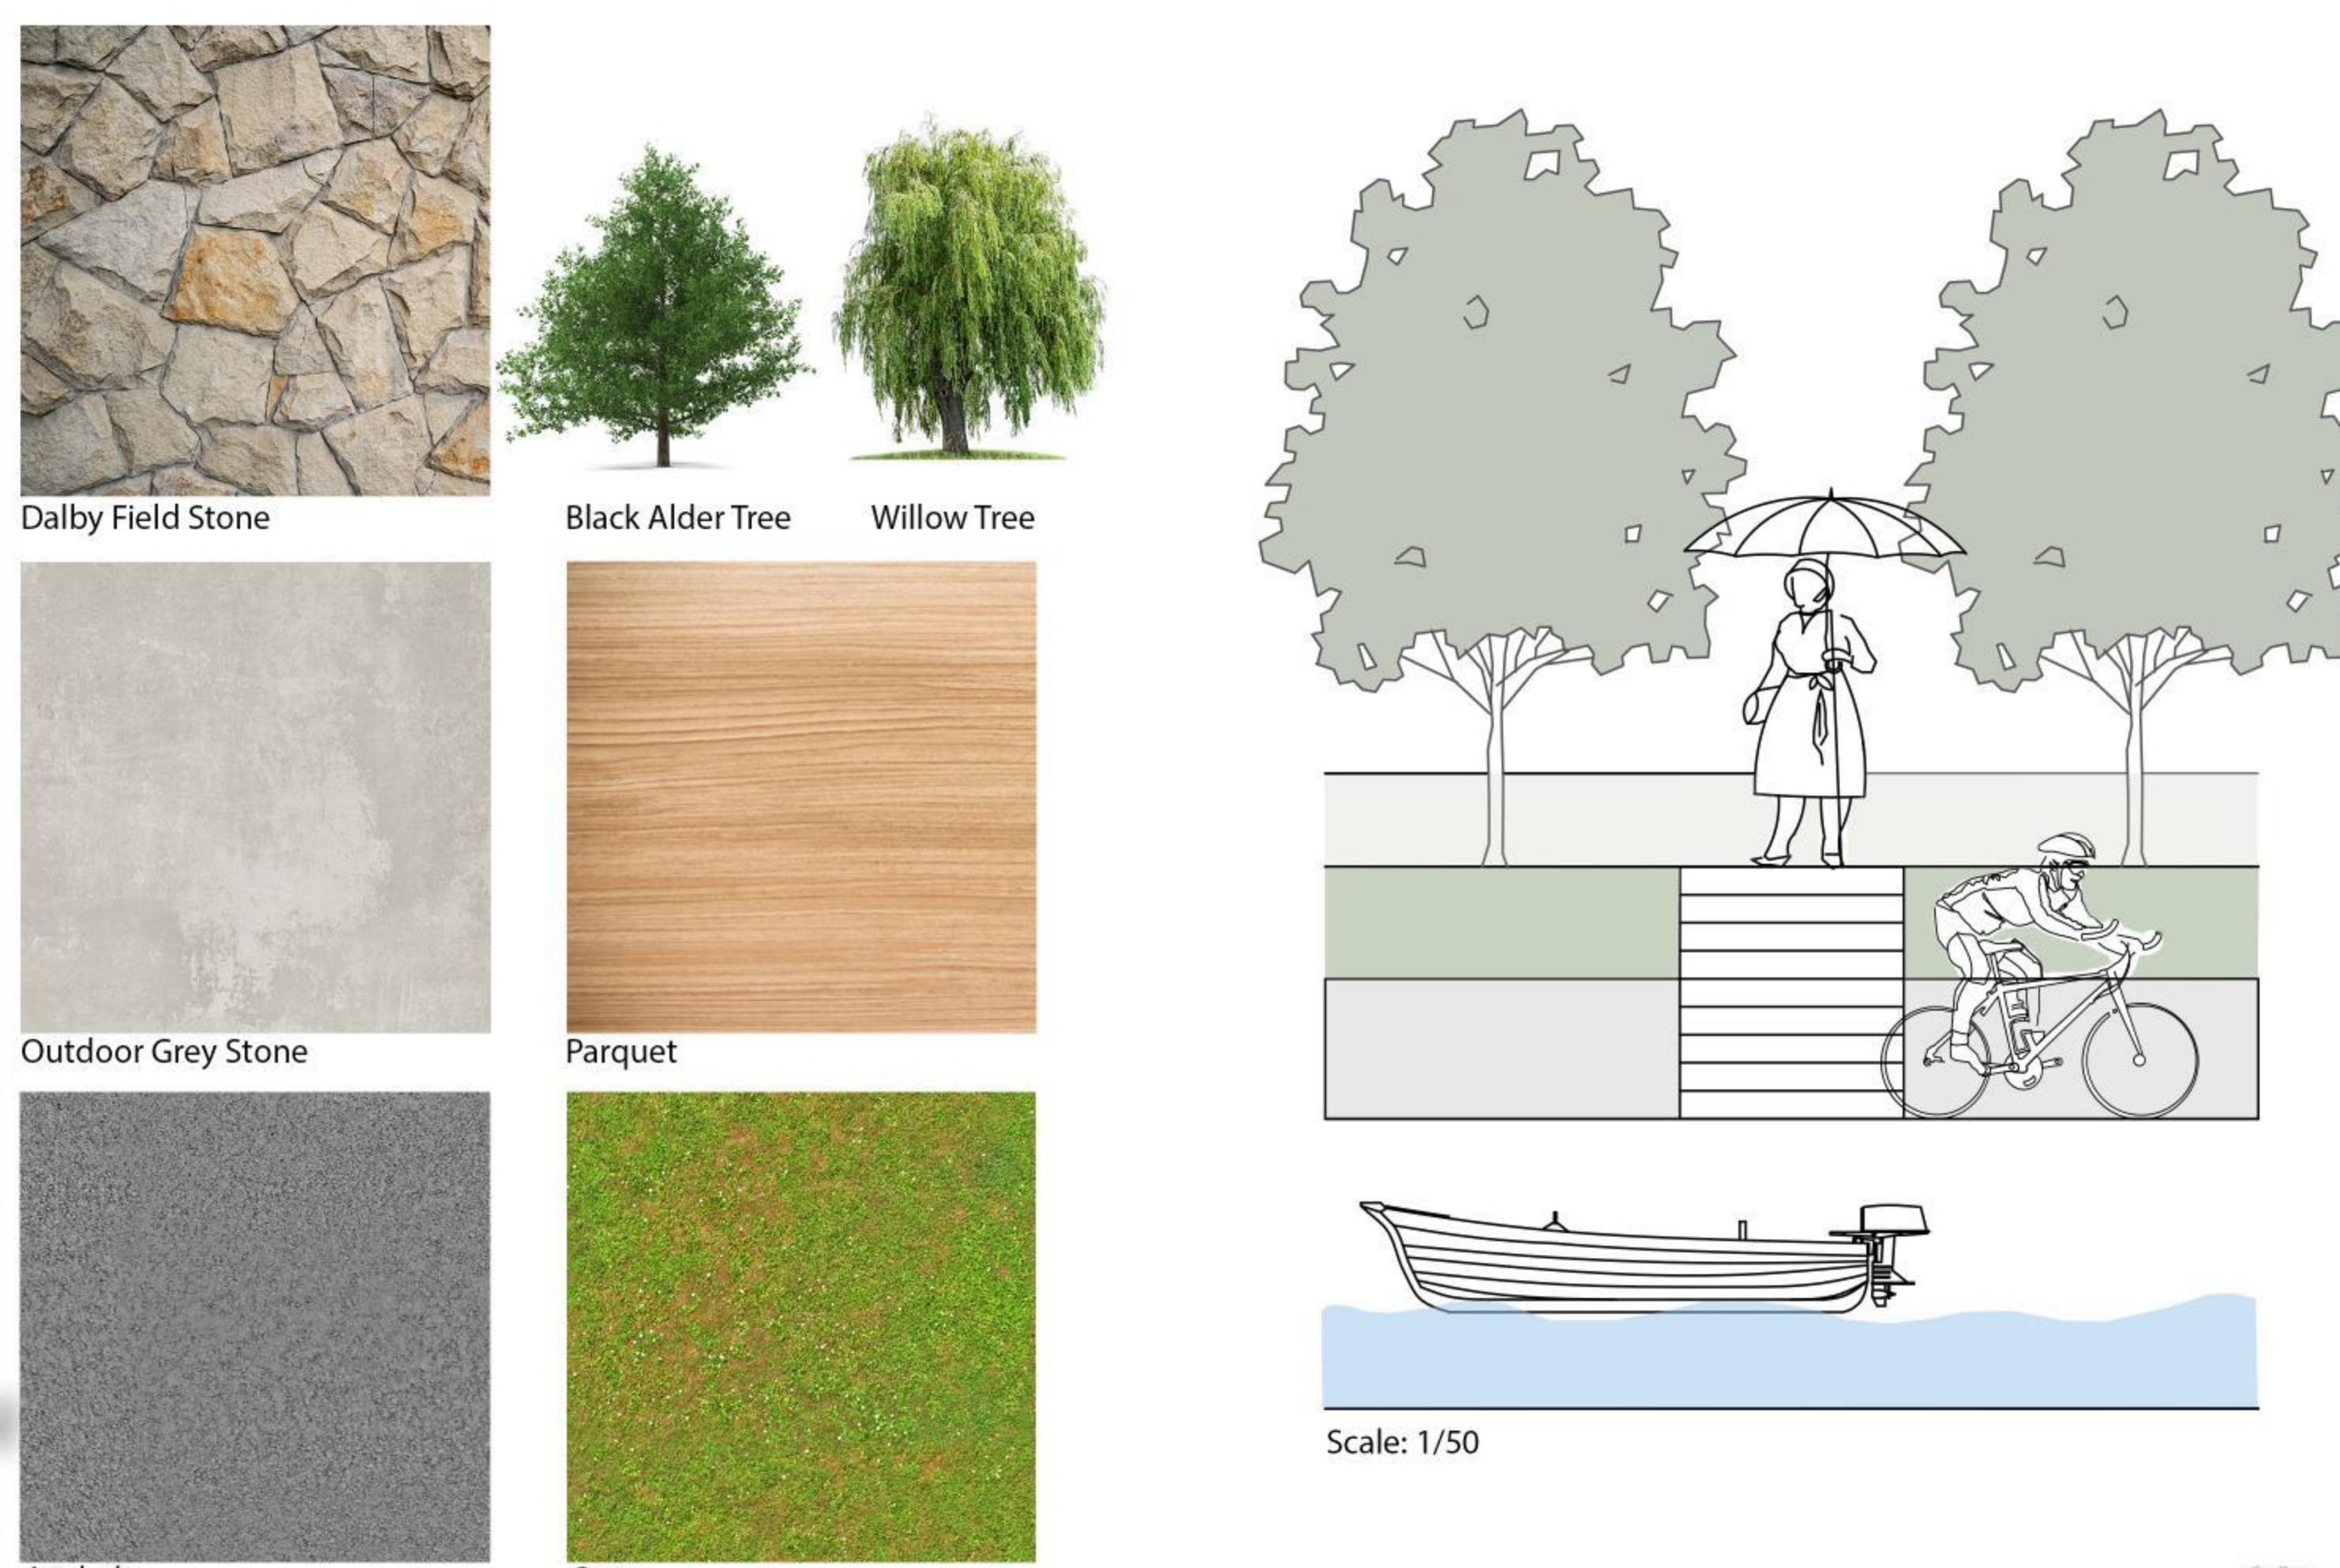

Section B-B Scale: 1/200

**Digbeth – Birmingham** is an industrial heritage regeneration through adaptive reuse, creative industries, and social activation. Former warehouses and industrial spaces were transformed into art venues, cafés, bars, and public gathering spaces while preserving the raw industrial identity. The project demonstrates creative reuse, temporary interventions, pedestrian connectivity, and community-led regeneration within an active urban landscape.
